Packing List:

Please refer to documents provided in the boxes.

Assembly & Maintenance

1. Place the parts on a soft surface to avoid scratches and damage.
2. Loosely tighten bolts as you assemble. After the greenhouse is built, and still loosely connected, tighten all bolts completely.

3. Keep the roof and gutters clear of snow, dirt and leaves in order to avoid damage to the product.
4. Clean the product with a mild soap and rinse with cold, clean water.
5. Do not use acetone, abrasive cleaners, or other special detergents to clean the product.

For PC Panels

6. Remove the clear film prior to assembly. The white film indicates the UV-Protected side of the panels. Peel back the white film to expose only the edges (until the panels are in place) to ensure that the UV-Protected side is facing outwards in final assembly.

7. Cover the two cut edges of the PC panels with the provided tape before installation to seal the channels & prevent moisture from getting trapped inside.

For Glass Panels

8. Use a glass suction tool (not included) for easier and safer installation of glass panels. Ensure all surfaces are clean, dry, and free from oil or dirt before use. Refer to your tool's manual for detailed instructions.

9. After the glass panels are positioned, use the provided roller tool to press the sealing strip into the gap between the glass and the frame, ensuring it is firmly secured.

Wall-side and Ground Foundation Assembly

STEP

01

Choose a hard, clean, and level surface to position your greenhouse. Ensure the wall is perpendicular to the ground at a 90° angle. If the selected area is not level, clear and level it before beginning.

● Option 1: Solid foundation

● Option 2: Solid frame

● Option 3: Firm ground / grass

The size of the greenhouse displayed is for illustrative purposes only and may not reflect the size of your greenhouse.

a. For wood surfaces, use Z13A wood screws and H79 washers to affix the base through the D589/D590 bracket to the ground and wall.

b. For cement and brick surfaces, drill holes at a 2" depth with a hammer drill and 25/64" drill bit. Insert S08A expansion bolts to the holes, then attach D589/D590 bracket using the included nuts.

c. For bare ground installation, purchase heavy duty landscape stakes at least 12 long with a diameter of $\leq 3/8$ ". Drive the stakes through the brackets and into the soil.

Wall Assembly

STEP

01

Slide 2 M39 nuts into the groove of L02H/Y frame, aligning them with the positioning holes inside the groove.

Attach the A158 bracket, secure it using S03A bolts into the M39 nuts and groove holes.

a. For wood surfaces, use Z13A screws to affix the threshold directly to the ground.

b. For cement surfaces, remove the threshold piece, drill pilot holes at 2.5" depth with a 5/16" drill bit, insert J129 expansion anchors into the holes, then use Z13A screws to affix threshold back to the ground.

c. Finally use J111 caps to seal the holes.

Note: The middle hole is not equipped with J111.

STEP
04

Assemble the L07 eave frame as shown using the A138 connectors and removed S26A bolts.

Attach the assembled eave frame to the vertical frames. Then slide four S03A bolts into the grooves of the L07C profiles for vent installation in later steps.

STEP 05

For PC panels

Remove the clear film prior to assembly. The white film indicates the UV-Protected side of the panels. Peel back the white film to expose only the edges (until the panels are in place) to ensure that the UV-Protected side is facing outwards in final assembly.

Cover the two cut edges of the PC panels with the provided tape before installation to seal the channels & prevent moisture from getting trapped inside.

For Glass panels

- H158/H159 Tape is not required.
- Handle with care to avoid breakage.
- Watch out for sharp corners and edges.
- Use glass suction cups (not provided) for safe handling.
- Do not apply excessive force or strike the glass during installation.

STEP
